IMPORTANCE OF ART

Transport Justice is the condition where all members of a society can **access** places and services to fulfill their **basic needs** as well as **opportunities** that allow them to **thrive**. Including - but not limited to - work, education, healthcare, nutrition, physical activities, green spaces and socialization.

# LESSONS LEARNED

Focus on accessibility, not mobility  
Count people, not cars  
Quality is (more?) important  
Ask yourself: who is not on the street?
